Pattern Maker design to production process

The design process can be divided in 3 parts:

1. 1) Development:
   1. a) First consultation, intake of initial designs and ideas and development.
   2. b) Fabric sourcing of required material
   3. c) Design confirmation
   4. d) Estimate for approval on fabric sourcing and payment of sourcing invoice
   5. e) Fabric selection and conformation
   6. f) Master pattern and first samples- Estimate and approval, deposit invoice at 50%
   7. g) Master pattern drafting
   8. h) First samples (timeframe 10 working days)
   9. i) Sample review
   10. j) Balance payment upon collection
   11. k) Estimate and deposit invoice for second round of samples if needed
   12. l) Second sample (timeframe 5 working days)
   13. m) Sample review
   14. n) Balance payment upon collection
   15. o) Sample and master pattern sign off
   16. p) Production costs and garment tech finalised
2. 2) Grading and production prep
   1. a) Determine pattern grading digital or by hand depending on sample review
   2. b) Determination of size curve
   3. c) Full invoice payment
   4. d) Grading (timeframe 8 working days)
   5. e) Marker calculation and fabric usage
   6. f) Trim allocation
   7. g) Production estimate review and deposit invoice
